

Alcester Health Centre

Dear Residents of Great Alne,

Great Alne is a rural area and we believe that being able to access health care in remote places with poor transport links provides benefits to all ages and sections of our community. With this in mind Alcester Health Centre has been working alongside Inspired Villages to make this a reality.

As a surgery we are extremely excited about the prospect of being able to be a part of your community and from December 2020 we will be providing a Primary Care service at Great Alne Park. Our ethos is to provide modern medicine with traditional values.

Not only are we there to look after you if you are unwell, we also place great emphasis on the prevention of disease. If we believe your current lifestyle is affecting your health or if you are diagnosed with a long term condition, as part of your ongoing care we can help you to make changes to your lifestyle.

We will also be working with Inspired Villages to invite residents of Great Alne Park and the surrounding area to join us in initiatives to improve personal health with a community based approach.

The surgery will be working with our patients in the area to continually improve the healthcare services we provide and to also have access the new NHS 10 Year Forward View staff that will be coming to Primary Care workforces including Social Prescribers and Community Pharmacists. Please visit <https://www.alcesterhealthcentre.co.uk/> for more information.
